

The Rush Soccer Club continues to push itself and its players to reach the highest level of our sport. Whether that is through the professional ranks or the college levels, the Rush is proud to support all of its players through every endeavor.

This collegiate support begins with the U15 age groups and goes through the college years and on to adulthood for any player that chooses to take advantage of it. With the college contacts, relationships, and friendships that the Rush Soccer Club has established throughout the years we are able to help with the initial search, selection and attendance of thousands of NCAA, NJCAA, and NAIA universities, colleges, and junior colleges.

This process begins with the College Advisory Program (C.A.P.) and the college counseling that takes place several times a year throughout the player's high school careers. Our support and assistance continues through the player's collegiate career. The Club provides an outlet to players looking to transfer for just about any given situation. As these same players reach adulthood and look at the next steps after college, the Club is there as well. Players seeking employment in and around the soccer related communities often call on the Rush Staff for assistance and consideration.

The Rush Soccer Club is proud of its own accomplishments but in truth, without the players these accomplishments would not be possible. The Rush Soccer club shows its respect and appreciation to our college bound, college age, and graduated players by publishing periodic updates on our [alumni](#). Please feel free to email the Rush Soccer Club if we have missed anyone!

The Rush Soccer Club is proud of our accomplishments. Our current and previous players make all of this possible. We hope that our players, both current and previous are as proud of the club as we are of them.
